# What the Housewife Wants to Know

It is a fact that the meats which we sell are far superior to those commonly sold from market; the reason of this is that quality is our first consideration when making our selections. Another reason is that we do not leave it to the discretion of those from whom we buy to deliver what they see fit—we personally inspect every piece of meat which enters our doors, consequently we can guarantee every piece which we sell. The meat question is an important one in every home and we believe that we can convince you that it is to your advantage to patronize our market, if you will give us a fair trial.

### MILK'S MARKET

F. H. Milks

### Four people receive \$3000 each

The prize-winning word in our contest for a better name than "flashlight," is DAYLO.

In our announcement of this contest last Fall, we stated that "if two or more contestants submit the word selected, the full amount of the prize will be paid to each."

We have made our selection without regard to the number of duplications. The word DAYLO was submitted by the four following contestants, to each of whom we are paying \$3,000.00.

Mrs. F. C. Grow, 1219 Second Street, N. E., Watertow S. D. Katherine W. Hand, 1501-Mulvane Street, Topeka, Kansas.
Miss J. M. Schulz, 239 Second Street, Union Hill, N. J. 413 Park Avenue, Medina, N.

The decision of the judges was unanimous. They were agreed that the word DAYLO fulfills in a masterly way "the requirements specified.

DAYLO is indeed easy to remember and pronounce. In fact, it cannot be mispronounced, and its elements do suggest the nature and use of Eveready. "DAY" suggests perfect light, and "LO" means "Behold!"—"See!"

We wish we might personally thank each of the half contributed so earnestly and helpfully to the success of our

Sincerely

AMERICAN EVER READY WORKS, Long Island City, N. Y.

There is an Eveready DAYLO for every purpose—for the home, for the auto, for the individual, for the nightwatch, and in fact hundreds of other uses, too numerous to mention. We have a full supply on hand. Order one today.

### PATRIOTIC PARADE AND MEETING

Band. Auto Parade and School Children, Speaking at School House in Evening.

These will be a big patriotic street parade Friday afternoon composed of the Grayling band and decorated autos of school children, at 3:00 o'clock In the evening there will be a patriotic meeting at the High school audi-

torium at 7:30 o'clock. Everybody is invited to participate in these two affairs. Those owning autos are requested to line up on Ogemaw street near the school house not later than 3:00 o'clock. School will be dismissed at that time and the childreu, as many carrying flaga as possi-

ble, will fill the autos.

The route, as laid out by the committee in charge, will proceed From the school house on Spruce street to Michigan avenue, west on Michigan avenue to Norway street, north on Norway to Ottawa street, east on Ottawa street to Cedar street, south on Cedar street to Michigan avenue and

hence to the court house. A thousand flags have been ordered o be passed out to the school children but it is not certain that these will reach us in time, therefore it is requested that as many as can do so

In the evening there will be a meet-ing at the High school auditorium where a patriotic program will be renlered. It is expected to have a special speaker for the occasion. Besides this there will be songs by the school hildren and others.

Together with this, at the school nouse there will be an exhibition of pird houses made by the children of he school and prizes will be awarded for the best ones. The judges are Esbern Hanson, Reuben S. Babbitt and Mrs. Charles T. Jerome.

After the judges have announced their decisions the bird houses will be offered for sale. There have been many fine houses made and the exhibt is bound to be of great interest. This is a good time to show our appreciation of the work of our boys and

There will be music by the band in the evening as well as in the afternoon. It is hoped that everyone will be in attendance at the evening meet

### NOTICE TO AUTO OWNERS.

It is requested that every auto owner in Grayling and aurrounding counparade. Please-line-up on Ogemaw street near the achool house promptly at 3:00 p. m. Friday, Mayl4. A good display of flags on your cars is also don, Ypsilanti,

p. m. and the children will be taken loped that there will be room for every achool child. It will require a great many autos but if everybody will make an effort to be there, ther will be plenty of room.

Parade at 3:00 p. m., Friday, May 4 Patriotic meeting at school auditorium at 7:30. -

To remain in nature always sweet and simple and humble and therefore strong; to love and to hold due reverence tar all people and all things, but to stand in awe or tear of nothing save our own wrongdoing.—Creed of the Open Road.

#### SAVORY DISHES FROM ITALY.

Our simple manner of cooking maca roni, one of the commonest of Italian dishes, is not a

large onion sliced. wash and remove the stems from a pound of tomatoes cut in small pieces; place all together in a large pan with two tablespoonfuls of olive oil, a sprig of parsley and a bay leaf; simmer gently for two hours, then add one pint of boiling water and continue cook until the sauce becomes reduced and thickened into a mass in which the different ingredients are well blended. Cook the macaroni until tender, drain and place a layer in two cupfuls of chopped or shredded. the meat sauce. Repeat until the dish is filled. Cover closely and let stand in the oven for five minutes until well

Chicken Livers With Mushrooms. Cook the livers (six of them) with the same number of coarsely chopped and garnish with mayonnaise made mushrooms in a cupful of stock for a half hour; cool and drain. Prepare batter with two tablespoonfuls of flour, a little milk, and salt and pepper two or three tomatoes with one cucumto taste, and one beaten egg. Add the ber will serve several people if care-livers and mushrooms and drop by fully cut. A firm, ripe tomato, spoonfuls in a little hot fat in a fry- if small, may be cut in halves ing pan. Cook until a golden brown thus serving two, or, if large, on each side and drain thoroughly be cut in slices for three or four. fore serving.

them through a sieve, add the juice of with finely mineed southern onlor two oranges, sugar to taste, and add a then serve with either French or may half pint of heavy cream, whipped. Serve in sherbet cups garnished with whole chestnuts and a cherry or a small cube of jelly of bright color.

Cooked chestnuts and orange rind cooked in a strup, using only the yellow of the rind, then served with bifs of fresh orange and mayonnaise on water cress or head lettuce makes a most delightful salad, which we can appreciate on this side of the water.

It's no in books, it's no in lear To make men truly blest;
If happiness has not her seat
And center in the breast,
We may be wise or rich or gre But never can be blest

### CHICKEN FOR TWO.

In a family of two, poultry is not as often used as desired because it is too much meat to be cooked at once. In some markets a half a chicken may be purchased but even when this is not possible a fowl may be spread over several days vithout becoming onous. For one meal the drumsticks may be cooked, these from a six

to eight pound fowl will furnish sufficient meat to satisfy any appetite. After stewing them in a little boiling water to keep in all the juices and flavors, brown them in a little butter and serve with drawn butter sauce and baked potatoes. The prepared in the form of a small chicken ple with the giblets made into a rich sauce to serve with it. Now the breast may be cooked, served in a white sauce as cream chicken or thinly sliced and used for sandwich filling or combined with celery and apple with boiled dressing making a most delicious salad. The second joints may be cooked and browned as were the drumsticks or they may be cooked to make a fine broth, removing the bones and add vegetables and cook in

& casserole, adding rice or macaroni-Chicken Jelly.—Take one chicken breast, a pint of stock in which the chicken was cooked, and a package of geintin. Dissolve the geintin, add onion juice, celery salt or various seasonings, add the breast and mix all together. Pour in a mold and when hardened serve as a salad with dressing.

After all the chicken has been consumed but the bones, they too, may be stewed after cracking them. Cover them with cold water, add a slice of onion and cook until all the flavor has been extracted. Strain, add a little cooked rice or barley, one or two beat-en eggs, and some hot milk or thin with plenty of seasonings and you have a most delicious cream of chicken soup

The thrilly housewife in these days, scales the feet and skins them when they are cooked in the broth after all are well trimmed. They contain quite little gelatin and add to the flavor

For an invalid's meal a bit of broiled chicken breast served on toast is amost dainty meat. It may be broiled in a bit of buttered letter paper, wrapped firmly, and pinned together, thus saving all the fine flavor. The

Electrocytion Thought Painful.

Considerable sentiment against the the of electricity as a means of putting unwanted animals out of the way is swing up among members of humane ideities in various parts of the countries. The popular belief now is that simals when electrocuted suffer interacting the Humane district of Kansas City, Mo., have been described as wife intelligence cambrains in which spinless of persons father than the contribution of the second capacitation. H 25 were obtained. These to M.

small fillets are more tender than the larger ones and two may be served if one does not seem sufficient.

### SEASONABLE SALADS.

chopped peanuts and a little cream mold in small balls and

dust until red, with paprika, place three on lettuce leaves and garnish have them cut in the of tulips. Serve with any salad dressing Cauliflower Salad .-

Trim the stalk and out-side leaves of a fresh cauliflower and sonk in salted water for 30 minutes. Then wash carefully and cook in saited water until tender. Remove from the fire and when cold carefully remove the center and fill the space with cooked peas drained and seasoned. Pour French dressing over all, garnish with lettuce leaves

a serving dish, sprinkle generously a serving dish, sprinkle generously with Parmesan cheese and cover with green peppers and one red one, mix the meat-sauce. Repeat-until the dish well and mold. Serve with mayonnaise. on lettuce.

and serve cold.

Apple Salad.—Arrange diced pineapple on lettuce leaves and in the cen-ter put a few shrimps, around this put a circle of chopped apple and celery pink with paprika.

Tomate and Cucumber Salad --- While Arrange these pieces of tomato on head Chestnut Creams.—Boll, shell and lettuce and heap on each slice a spoon-skin a pound of large chestnuts. Pass ful of fluely diced cucumber mixed onnaise dressing.

A few dates and raisins added to Waldorf saind makes a change and is liked. Take twice as much apples a celery and a few nuts with a handfu of dates and raisins, mix well and serve with French dressing on lettuce or in nests of water cress which is especially good at this season.

Poinsettia Salad.—Simil, bright, red tomatoes may be cut in sections like flower, either six or eight petals, and the center filled with a vellow dress ing, served on lettuce or water cress it makes a most attractive salad.

There is not a creature from England's To the peasant that delves the soil, That knows half the pleasures the

# SCOUTS AS LIFE SAVERS

By ARMSTRONG PERRY.

The most common element in accidents is preventability. The carelessly thrown match, the day-dream on the railroad track, the mind which wanders from the hand upon the lever, the fool who rocks the boat-these are they who keep the surgeon and the undertaker and the dealer in artificial limbs working overtime.

Boy Scouts are taught to foresee and prevent accidents. When a boy is taught anything he is ever on the alert to use his knowledge. The result of the scout training is shown in a re-markable way in the records of the national court of honor.

There are about 170,000 secuts in the United States, most of whom go on a hike at least once a week throughout the year and camp out for a week or more every summer. It would be natural to expect that with this number of boys, all of the most reckless age, climbing trees and hills, cutting wood and building fires, the number of serious and fatal accidents would be large. Not so. The national court of honor, which awards medals to scouts who risk their lives in saving others is called upon to consider only three or four cases a month and in most of these the person rescued is not In most of these cases the rescue

is due not only to the presence of mind-and heroism of the scout, but also to his foresight in providing himself with equipment for use in an emergency and his diligence in learning the methods by which rescues may be effected. A scout who was thoughtful enough to carry a coll of rope at his belt when he went skating saved a boy who broke-through-the-ice. One of the youngest scouts saved a child from bleeding to death from an artery severed by a piece of broken china on a heach. His scoutmaster had taught him how to apply a tourniquet, using a handkerchief and a stick. the reunion of the veterans of the war of the states at Gettysburg, at the review in Washington in 1915, and on many other occasions where enormous crowds have assembled, the scouts have saved many from the affects of heat exhaustion, by being on the spot the means of quickly finding medical aid. Many a scout has gone to the assistance of a drowning person, released himself from a death grip, fought his way to safety with a load heavier than his own weight and, at the point of exhaustion, has been obliged to apply artificial respiration while a crowd of able-bodied men and women looked on, unable to do anything because of their

A community which fails to protect itself against calamity by developing the latent power in its boy population deserves the same fate as the man who goes without fire and accident and health insurance.

iguorance of a few simple but vital

### SCOUT CHARACTERISTICS.

They do at least one good turn every

They consider a strange boy a friend, not someone to tense or fight. Their motto is "Be Prepared," which means to them prepared to help oth-

They know how! In case of accident they render first aid while others stand about and feel sympathetic. They love the out-of-doors and know

ow to take care of themselves in the open. They know about animals and do not consider every snake a poisonous enemy, nor do they think that every

crawling thing with more than eight legs is a centipede. They know the names and charac-

teristics of the different trees and consider them as something beside a target for axes or material for whittling

### AMONG THE SCOUTS

scout is a patriot and is always ready to serve his country at a min-ute's notice. He loves Old Glory and knows the proper forms of offering it respect. He never permits its folds to touch the ground. He knows how his country is governed and who are the men in high authority. He desires a strong body, an alert mind and an unconquerable spirit, so that he may serve his country in any need. He patterns his life after those of great Americans who have had a high sense of duty and who have served the nation

A scout, like an old frontiersman, does not shout his wisdom from the housetons. He possesses the quiet power that comes from knowledge. He speaks softly and answers questions modestly. · He knows a braggart, but he does not challenge him, allowing the boaster to expose his ignorance by his own loose-wagging tongue.

Evansville (Ind.) Boy Scouts Leve just established a new wireless station and claim that they will soon be able to talk with New York. New York scouts who have stations are engerly awaiting a message from the Indian

A scout never flinches in the face of danger, for he knows that at such a time every faculty must be alert to preserve his safety and that of others. He knows what to do in case of fire, or paule, or shipwreck; he trains his ty-two, recently when he called on the marriage license clerk with Mary and all emergencies he sets an example of mind to direct and his body to act. In resourcefulness, coolness and courage, and considers the safety of others before that of himself.

### PREVENT COWS LYING DOWN

owa Man Has Practical and Inexpen sive Device Attached to the immovable Stanchion.

In the summer or spring, or at other the same respiring of at other times after rains, the yards around the barn are muddy. The cows are ariven into the barn preparatory to milking. They are fastened in the stanchions. The result is that the floors become dirty and dusty. The mud comes off the feet and adheres to the platform on which the cows stand. Again, it is not infrequent for a cow to lie down on the dirty platform, and another cow to urinate on that cow's tail. It is a rare thing that two or three cows out of ten will not down before you are ready to milk. To prevent them from lying down for an hour or more while you re milking, is the object of the device here illustrated, writes J. N. Muncey

of Buchanan county, Iowa, in Wallace's Farmer. It is inexpensive, unpatented, easily made, and practical, it is a labor-saver. It frequently saves the milker from a swat across the mouth with a dirty tail.

"A" is a fence board, which may be nalled or bolted or temporarily attached to the immovable stanchion. It should be placed just high enough above "B" so that its upper edge just touches the lower edge of the cow's neck when she is standing. The same or a similar device may be used on the patented swing stanchions, I think though I have never tried it.

If you use it in winter, be sure and put a sign of warning at the head of your bed, so that at no time will the poor cows be compelled to stand up all night long. It is an advantage to clean all the udders at once, and when they are clean and ready for milking, a man dislikes to have any one of the cows lie down and get her tail in the urine and her udder in the dirt or manure; and when she does get up she'll swat both cows next to her, and you frequently have to clean all three,

PROTECTION FOR MILK CANS

Heavy Blanket, Dipped in Water and Wrapped Around Receptacle,
Keeps Out Much Dust.

The only way to have cream-reach he creamery as clean as when it left the farm is to protect the can. This in hest done by the use of a heavy blanket, kept for that purpose, dipped in clean water and wrapped around the can so as to completely cover all but the bottom. Dust will sift through a dry blanket quite rapidly.

The cream can, even if protected from dust, should, if possible, be-keptshaded during transportation to the creamery.

If the creamery managers and butter makers would insist that patrons protect their cans the grade of cream would be greatly improved, the cans would look better and the labor of washing before returning them to the patrons would be greatly reduced.

### STALE MILK CAUSES SCOURS

Pails and Utensils Used in Feeding Caives Must Be Kept Clean to Avoid Diseases.

Old-or-stale-milk-often-causes-indirestion or scours. A calf is better off to miss a feed than to have a feed of sour milk Pails and utensils must be

A good rule is to keep the calf pails as clean as the milk pails. The hand eparator on the farm makes it possible to get the milk to the calf fresh,

warm, and sweet. Calves can be raised on skim milk where cream is raised by gravity, butmore difficulties are experienced.

### GET FAMILIAR WITH HEIFERS

Handling of Young Animais in Advance of Freshening Is Necessity
In Minds of Dairymen.

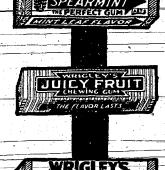

The best plan is to pet your heifers annule them so they are familiar with your presence. They soon become doand will follow their caretaker around to be rubbed and handled, and all the kicking, timid, shy tendencies leave them.

The handling of the heifer in advance of, the freshening period is a necessity, in the estimation of many of our best dairymen and cow owners.

Where Milk Comes From. Some people buy their milk in tin but the dairyman gets his direct from the cow by the swent of his brow.

GRAYLING, THURSDAY, MAY 3

THE WAR department recently anganizations has been changed. It is understood at the headquarters of the one brother. Michigan War Prepareduess Board admitted to complete the Michigan-Ohio division.

If the bars are let down no further than this, the new units will be a few troops of cavalry and a few batteries of artillery, only. This need not worry the young men who is anxious to enlist; there is a place for him in companies already organized and equip-

Michigan has three regiments of Infantry, each regiment containing 15 companies; two troops of cavalry; two batteries of artillery; two ambulance companies and one field hospital; an engineer company and a signal corps company. There are, all told, about 4,000 men in these organizations. To put them at war strength, about 3,500 ore are needed today.

Enlisting in a company already in service, or armed, equipped and awaiting the call, has distinct advantage over waiting for a new draft. Practically every National Guard officernow in service has been in mobilization camps or on the border for from six to ten months, learning the duties of his profession, which means that his men will be as well cared for as if enabling them to be with friends from their home towns. There is plenty of the probation period. The recruit can

Most of these advantages do not exist in new organizations and the privilege of picking and choosing may be impossible later. And the government need is as pressing now as it can

### The STAR-Local News

SPANGLED

By Francis Scott Key-

SAY, can you see, by the dawn's early light.

What so proudly we hail'd at the twilight's last gleaming, Whose broad stripes and bright stars through the perilous fight O'er the ramparts watched were so gallantly streaming? And the rocket's red glare, the bomb bursting in air Gave proof through the night that our flag was still there. O, say, does that Star Spangled Banner yet wave O'er the land of the free and the home of the brave?

ON the shore, dimly seen through mists of the deep, Where the foe's haughty host in dread silence repose
What is that which the breeze o'er the towering steep,
As it fitfully blows, half conceals, half discloses? it catches the gleam of the morning's first beam, glory reflected now shines in the stream. Tis the Star Spangled Banner! O, long may it wave O'er the land of the free and the home of the brave!

A ND where is that band who so vauntingly swore,
That the havor of war and the pattle's confusion,
A home and accountry should leave us no more?
Their blood has wash'd out their foul lootsteps' pollutions.
No refuge could save the hirding and slave.
From the terror of hight or the gloom of the grave.
And the Star Spangled Banner in triumph doth wave.
O'er the land of the free and the home of the brave.

O THUS be it ever, when treemen shall stand

Between their lov'd home and the war's desolation! Blest with vict'ry and peace, may the heav'n rescued land Praise the power that hath made and preserv'd us a nation! Then conquer we must when our cause it is just.

And this be our motto: "In God is our trust!"

And the Star Spangled Banner in triumph shall wave O'er the land of the free and the home of the brave!

[From Key's own manuscript.]

# Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

There is a peculiar grinding noise in the transmission of my car. It is noticeable only when running on high speed and at a rate of from about fifteen to twenty-five miles per hour. Can you advise me as to what the trouble might be?

If the gears give a steady hum when the car is operated in high, there may \_\_\_It is generally supposed that a motor-be\_nothing\_wrong\_with the gears, A car will stop in a shorter distance if steady hum from the rear axle is emitadjustments or by the gears being alparticles of metal. There may be one of dirt on one of the teeth may cause like that caused by gears which themselves are running out of alignment. The thrust bearings may be worn. It is advised that you have the gears removed and trued up in the shop, for it is almost impossible to detect the cause of an out of round when the gears are in the casing. If you do not wish to sept his cough loose and relieved him and before placing it into the case sene freely in both instances.

My car begins to lag when about half-way up a hill. Does the slanting posi-tion of the car interfere with a proper supply of gasoline to the carburetor? It is not likely that your trouble is due to the position of the tank, but it is probably caused by dirt in the The Board of Review of the teed pipe. The dirt does not prevent the flow entirely but reduces it so that the Town Hall: May 15 and 16, Boat chamber to satisfy the extra de-1917, for the purpose of review- mand put upon the car when it is climbing a hill. Disconnect the feed pipe at the carburetor and note whether the flow is free; if not, remove the pipe and clean it with a wire. If the trouble still persists, adjust the car-buretor to give a richer mixture.

The gasoline flow, due to the low position of the tank, should not be affected except on a steep hill. If you feel, however, that the flow is not sufficient you might install a tank holding about a pint directly in front and slightly above the carburetor. This slightly above the carburetor. tank is merely connected in the line. has no valves and is only a reservoir, but with sufficient capacity to carry the longest hills, even though the sup-ply of fuel were cut off.

Can a vibrator be converted to a non-vibrator coil for use with a low tension magneto?

Arribrator coil could be used as a nonvibrator coil by removing the vibrator mechanism entirely and taking the primary and secondary terminals and attaching them to their proper places. Another way would be to short circuit the vibrator terminals. The coll then virtually becomes one of the nonvibrator type. This practice is not recommended, and in connection with a low tension magneto it might result in considerable trouble. There would be little gained, as the magneto already has an interrupter and is designed for use with a nonvibrating coll.

What is your opinion of a transmistion service brake? As a general proposition such a brake is considered very efficient. In lesigning the parts of the cars, when a transmission brake is to be used, the extra strain that this imposes must, of

Which of the following methods will stop a motorear in the shorter dis-tance—applying brakes to lock the wheels or applying greatest possible brake strain without locking wheels? And will a heavy car stop in as short a distance as a light one, the speed-and brake power being equal?

It is generally supposed that a motor-

the wheels are not fully locked, but ted by nearly all makes of cars. How almost so and revolving. When the ever, if there are stresses at intervals brakes are applied so the wheels lock in the sound the gears may be out of the only friction tending to bring the round. This is another way of saying car to rest is that of the tires on the that either the gears are not running ground, but when the brakes are apof shape. Such a condition may be there is rolling friction of the wheels caused by improper initial, but more gear set and rear axle friction and usually by tampering with the bevel brake friction; hence with the greater friction the car will stop in a shorter lowed to operate in oil containing small | distance, If you will watch street car or more teeth with high spots. It is with air brakes or locomotive engisurprising what damage dirt can do neers at work you will find that when to rear axie gears. A small particle the conveyance is to be stopped the the gears to give an unsteady sound released, thus setting and releasing the brakes, which prevents the wheels from sliding. This not only tends to keep the vehicle from moving off the track, but stops it in a shorter dis-

> on the tracks. ery-respect, except as to the load carried, the one with the lighter load will stop in the shorter distance. This may be attributed to the fact that the intin of the heavier than that of the lighter. If you were pushing a baby carriage at ten miles per hour you could very easily stop it within a few yards, but if you were pushing a 800 pound cart you would find it would require a greater distance in which to stop.

tance than if the wheels had to slide

My car consumes too much oil. Could this be prevented by putting patent rings on top of the piston and drilling a one-eighth or one-fourth inch hole through the piston walls? Would graphite help this any? There is an oil feed from the precision oiler leading directly into the lower part of the ovlinder.

The use of patent rings will help to prevent-oil from reaching the combus-tion chamber, but we suggest that before you install such rings you deter-mine the cause of the trouble. Perhaps the cylinders are worn excessive In or the pistons worn too much, under which condition it would be better to use larger pistons. Perhaps too much oil is being fed to the cylinders. The oil is being sed to the cylinders. The dtilling of holes in the piston skirt also will help. Graphite is a good-labricant for the cylinders and tends to fill in the microscopic holes in the metal, but it would not entrely eliminate your trouble. There should be little fear of clogging provided you use the correct amount of graphite. correct amount of graphite.

The Oldham coupling between my clutch and gear box is very noisy. Could you tell me of a way to eliminate this?

Your coupling is probably made in three pieces, including the sleeve, ring and a square piece litting over the forward end of the clutch gear. There are therefore two places where wear can occur and cause noise in actionfirst, at the lugs of the Oldham ring and, second, on the square sides of the coupling. You should look at these points and measure the clearance. If the clearance is sufficiently great to cause vibration and noise, new pieces should be secured to fit.

Settlers in Maple Forest township are warned from letting their cattle or \$1350 on time, cash payment down. trespass on my farm meadows. The fences will be made safe as soon as the weather will permit, but I shall protect my property. E. O. Seriver.

### CHASING A COYOTE IN AUTO EXCITING SPORT

Hound, Sighting Game, Leaps Over Mud Shield and Lands Twenty Feet Ahead of Car.

Larned, Kan.—An exciting coyete chase in automobiles took place near Hanston. The party consisted of Bill Hann, John Hann, Mr. and Mrs. Irvin Seeman and William Warring. They went in two cars and took three greyounds in each car,

Mr. Warring says that auto polo is mild compared with the way those two cars chased across the prairie, ravines and bluffs after coyotes. He said that his speedometer registered forty miles one time when he dared to glance at its and he was afraid to look again,

They were going along between twen they started up the first coyote, and when the biggest hound in Mr. War-ring's car sighted the wolf it leaped over the wind shield and hood and anded running twenty feet shead of the car. The coyote was a big fellow but the hounds finally brought him down, the big hound throwing him, while the others pinned him down. While chasing the first coyote the

other auto nearly ran over another one. which leaped up almost from under the wheels of the car. The men shot at it several times, wounding it, but because of the speed of the bounding car could get but poor aim. It finally ran into a hole and was fished out with a wire. Messrs. Hann and Seaman have killed many coyotes.

### WIRELESS PLANT IN BED.

Annapolis, Middle Receives Messages Through Springs.

Annapolis, Md.-That a series of bedsprings connected by wires makes a satisfactory condenser for a wireless station has been proved by Midship-man J. B. Dow of the fourth class at

the Naval academy.

Dow has connected the springs of his own-and his two roommates' beds and attached them to a receiver. He has been able to pick up messages sent from and to the Arlington station. He has found out that it is not necessary to open the windows of his room in Bancroft hall for even to remove the

It is stated that Dow's use of the bedsprings to receive radio messages may be of considerable practical value.

Waits Fifty Years For Father's Gift. Pittsburgh, Pa.-It cost fifty years of waiting and a lawsuit against his stepmother, but John W. Baker of New Bloomfield recently received \$525. turned over to his mother by his father in 1867. It was to be his on his father's death, but Mrs. Rebe Baker, stepmother and administratrix.

# ARMED FREIGHTER SUNK BY TORPEDO

VACUUM, AMERGICAN OWNER AND MANNED, ENCOUNTERS SUBMARINE.

### **GUNNERS AMONG THOSE LOST**

ioss of American Blue Jackets Marks First American Casualty List in War With Gormany.

New York-Thirty-one American lives are believed to have been lost when the armed American oil-carrying steamship Vacuum was torpedoed and sunk-by a German submarine of the north coast of Ireland last Saturday while en route from a British to an American port.

Newspaper dispatches from London and cable advices to the ship's owners, the Vacuum Oil company, of New York, were conflicting but it seems established beyond doubt that the toll of life included Captain S. S. Harris, of New York; 20 members of his crew; the commander of the United States guard, Lieutenant Clarence Crase Thomas, a Californian, and 11 members of his crew.

The Vacuum had two lifeboats Boat No. 1 contained those believed drowned. Boat No. 2 has been land ed. It contained the Vacuum's chief officer, 13 members of the ship's crew and four naval gunners.

The loss of the American bluelackets marks the first American "casualty list" in the war with Germany gun crew's commander, Lieuten ant Thomas, is the first American of ficer to be killed in discharge of hi duty as armed guardian of a peaceful American merchantman,

The Vacuum displayed 2,599 tons. She was 247 feet long, with a 43-foot beam. She was owned by the Vacuum Oil company, a California concern. The ship was built in 1912 at Ecorse, Mich. Her name was originally Bay-

# BY CONSCRIPTION

HOUSE AND SENATE BY LARGE MAJORITIES PASS SELECTIVE DRAFT MEASURES.

### MANY AMENDMENTS ADOPTED

All, Men. Between Prescribed Ages Regardless of Condition Will Be Forced to Register.

Washington.-The American army in the war against Germany will be raised by conscription.

The fight in congress for the administration's ejective draft measure was won after days of bitter debate when the house passed the bill by a vote of 397 to 24. The bill, in some what different form, was passed later by the senate, \$1 to 8. The house bill would draft single

men between the ages of 21 and 40 years of age, with the president having authority to designate which shall be called to the colors first. The senate measure provides for conscripting single men between 21 and 27 years of age. --

This difference in the provisions will make it necessary for the mea-sure to be sent to a joint conference of house and senate members where the ages prescribed will be decided on finally. Soldiers Pay Raised \$15 a Month.

Provisions were struck out and inserted in the bill in rapid action by the house. By unanimous vote, an amendment was included in the house bill to increase the pay of enlisted men and non-commissioned officiers in the army and in the national guard by \$15 a month, making the pay of enlisted men \$30.50 a month. This would add about \$20,000,000 to the army and national guard pay-roll monthly, if an army of 1,000,000 men is raised.

### Volunteer Amendment Loses.

In the senate the volunteer amend lost by a vote of 69 to 18, and in the house it was 279 to 98, supporters of conscription marshalling a strength which surprised even administration leaders

Senator Hardings' amendment de signed to permit Colonel Roosevelt to raise four infantry divisions (80, 000 men) for service in France, was adopted by the senate, 56 to 31. Many Democrats voted for it. A similar amendment was rejected by the house.

An amendment was adopted which ism, and insure the world's liberty, by that the first 500,000 men would be not only exempts all ministers from doomed, he said, should Prussianism called to the colors about September the draft but also all students at theological seminaries.

> Washington:-The first 500,000 \* -- men for America's army to be raised under selective conscrip tion will be called to the colors about Sept. 1 of this year. Secre. tary Baker announced.
>
> The first national registration

day will be about June 1. It will \* probably be denominated by presi-\* dential proclamation."

. . . . . . . . . . . All Liable to Service.

Whatever the age limits fixed by congress there will be no discrimination between men within these limits, matter and explained what the ex mast for Ole Paus was respected by on-the ground of age, Judge Avocate General Crowder of the war depart. ment has told inquiring members of congress.

It is the opinion of Gen. Crowder that if men between 21 and 40 are finally included in the draft, President Wilson must list all men between these ages and pick by lot from all those not otherwise exempted from service, regardless of age.

-Under the plan, as the judge advocate general has outlined it, each voting precinct in the country will be assigned its quota based on proportion of its population to the whole population of the nation.

All men between the prescribed ages, regardless of condition, are required to register. Then all of drawn by a board selected for the

### Possible Exemptions.

Under rules laid down by the war epartment and in accordance with the provision of the army bill, ing possible exemption of men physically unfit; those needed in manufacture and agriculture at home: thos with dependents, etc., the board will decide the eligibility, to service of each man as he is drawn. The board will continue to draw out names until it has found the full quota of me not subject to exemption.

The fact that a man is not accent ed in the first drawing does not preclude the possibility of his being called on later. For example the first drawing may exclude all married mon whereas married men may be included in a later drawing.

# SOLDIERS IN NEED OF SEWING KITS

WAR BOARD ASKS WOMEN OF MICHIGAN TO SUPPLY THESE NECESSARY ADJUNCTS.

22,500 WILL BE NEEDED

Each Soldier's Outfit Should Include One of These Kits and Contain Needles, Thread, Etc.

(By W. L. CALNON.)

"Housewives' kits." neat little 'adjuncts to a soldier's outfit containing thread, needles, buttons, pins, etc., are needed by the members of the Michigan National Guard.

Any woman in the state, or any sewing society, wishing to do something patriotic, can get busy on the "house wives," according to the suggestion of the war board. Major Roy C. Vansecretary, believes that the women of the state can do nothing now than make the "housewives' kits."

"The Thirty-third is in the service now," says Major Vandercook, "and the chances are that the rest of the guard will be in before long. Then will come the recruiting up to full war strength, which will be a total of 7,500 men. The draft will ask Michigan for 15,000 more. That means 22,500 men who will want the kits. They are not hard to make and they will be appreciated. The war-board will take all they can get. Send them in, the sooner the better, and we will dis-

Go ernor Signs Enrolled Acts.

Vatil May 10, when the legislature con enes again to take its final ad-journment, the chief business connected with the law-making process of the state is centered in the office of Gov ernor Sleeper. The enrolled acts of the house and senate are being designed by Lieut, Gov. Dickinson and

The final adjournment of the legis lature will be had at 12 o'clock noon on Friday, May 11. Sessions will be held in both houses on the day preceding, so that if any errors are found that must be corrected they may be ing of the session is had. . It is expected that the governor will be able to report on every bill laid before him by the\_time\_the\_sine\_die\_adjournment\_is taken.

In addition to the winding up of legislative activities, the governor's office nas been the scene daily of important conferences in relation to war preparedness measures. With the signing of the Foster-Petermann bill authorizing the state's \$5,000,000 war loan, it has been possible for war prepareaness work to be conducted with dispatch.

For the present, the item of food preparedness is receiving nearly all the executive attention. The food board is devising every means it can to encourage the greatest production.
of crops the state ever has had, inorder to forestall the danger of a food shortage in the state and nation next fall and winter.

The Michigan Railroad Association has 'loaned' to the war preparedness board, the services of its secretary, Charles E. Webb, and the latter will the transportation end of the preparedness work. At the outset he endeavoring to find adequate means to distribute throughout the state all the seed and fertilizer that can be ob-tained. Later, when the added forces is intended to marshal for farm work are ready, the work of placing them about the state also will come up to the transportation department.

Official standing already has been given by the war board to numerous companies of home guards that have been formed in Michigan towns. Home guard service does not obligate any one in it to federal service, but neither does it exempt them from it. It is. hoped that the guard will be a nucleus from which regiments of soldiers for ' federal service will be organized in Michigan.

The home guards will be permitted to use the armories in their towns. They will be organized in companies of fifty men each and the guardsmen and their officers will be enlisted for three years, or for the duration of the war, and the officers will be given commissions. Motor and cavalry pa-trols will be part of the guard as well as infantry. Age is no bar to guard service.

The official designation of the will be "Michigan State Troops."

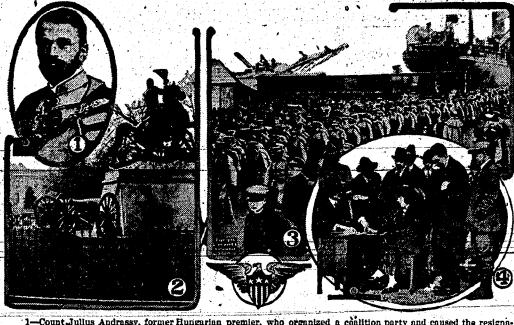

The war preparedness board de cided to grant the petition of Olivet college for a military instructor.

An organized board of busines men has been formed in Romeo, Ma comb county, to promote food production and committees are being ap pointed to canvass farms within fir or six miles of the village to determine just what is needed to in crease crops. Carloads of seed potatoes and beans have already been or dered by the business men.

Representative G. E. McArthur of Eaton Rapids will speak at a big patriotic meeting to be held-at-Potterville Saturday, May 5.

Two United States secret service men arrested two Germans at Gastara on the charge of having taken the spikes from the Chicago & N. W. requits left Iron River. First American Shot in the Great War Destroys a German U-Boat.

### FIRED BY LINER MONGOLIA

Destruction of Shipping by Subma rines Now Threatens England With Food Shortage - Great Britain Gets Money From-Uncle Sam.

BY EDWARD W. PICKARD. America's first shot in the war with Germany was fired on April 10. It scored a direct hit and destroyed a German submarine. The shot was fired by the gun crew on the American liner Mongolfa when a U-boat attempted to attack that vessel in the Irish sea and after other shells were sent there was an explosion and the submarine did not rise again. Capt. Emery Rice on-arrival-in-an-English-port. It-is got the U-boat had been named Theolore-Roosevelt by the gunners.

The destructive work of the submarines is causing increasing anxiety in Great Britain. The Intest weekly report of the admiralty shows a much larger number of ships sunk than did any previous report, and on Wednesday Lord Davenport, the British food controller, solemnly warned the British public that severe privations menaced the nation before the nex harvest—was -reached. This aroused the London-press-to-gloomy comment, the burden-of-which was that the submarine blockade was the most serious feature of the war now and that if Great Britain was to be saved from starvation and possible defeat something must be done mighty soon to counteract it. This something, obviously, is the turning out from stream of tonnage, but though many ships are being built, the shortage of skilled labor remiers it impossible to construct anywhere near the number required. The great British navy Is powerless to relieve the situation. No one-over there seems able to suggest

### Germans Resist Desperately.

"This is the last and deciding push, for we soon shall be able to hold out no longer" reads the diary of a German officer who was captured hist Monday, and that seems to be the chief, judging by the desperate opposition he is putting up against the drive of the ailles in northern France. Resuming their part of the offensive at the beginning of the week, the British have made considerable progress, especially along the rouds from Arras and Bapaume to Cambrat. In the semiopen fighting their heavy howitzers were of little use, but their field guns and machine guns were handled with wonderful skill and rapidity and the Germans suffered enormously. Von n note-concerning-submarine warfare Hindenburg threw dis reserves into with the warning-that Spanish pa the battle with a prodigality that astonished his adversaries, and the Teu- imperial government consented to a pented and fierce counter-attacks culties which have orisen in Spatin, proved their ability to do so. Because this room is tucked cozily into a corwhich, however, were of little avail King Alfonso has tried diligently to it is impossible for some lovers of ner and a little sent is built against the and left the ground covered with their preserve neutrality, but it seems as if slain. The German line, thanks to his efforts were doomed to failure. the astounding numbers of men Von Hindenburg-has been able-to bring up,

# DESIGN RESIDENCE TO FIT BACKGROUND

Satisfaction With Your Home Heightened if the Place Is Beautiful.

YEAT DWELLING DESCRIBED

Plant Dark Leaved Shrubbery Near Structure and Make Foundation of Dark Texture Brick for Most Pleasing Results.

By WILLIAM A. RADFORD. Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers, of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquires to William A. Radford, No. 122 Prairie avenue, Chicago, Ill., and only enclosed two-cent stamp for reply.

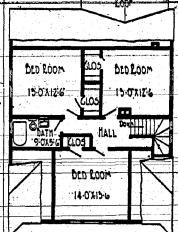

There is, of course, a direct relation between the house and its surroundings. By this we mean that either the surroundings must be laid out for the house, or, as in the case where a spot of special natural beauty is selected the phrase of "a peace without vic- for the ballding site, the house must be designed for the surroundings. latter case obtains in some small towns and in country estates. The former case, or a compromise between the two, exists in the larger towns and cities.

Perhaps it is not the case in this country so much as it is in some of the European countries, but the fact is with the upper dark portion, is very true, nevertheless, that for the lover of beauty both natural and architectural. the small town which has been situated where nature has furnished plenty of walls is finished with shingles, while where nature has furnished plenty of trees, a pleasing topography and cleardeserters are pensant soldiers who are watered strenms-such a town-offers hastening to their homes in fear that the best possible site for the building house and litted in a manner which rnment, but to advise and assist it there will be a distribution of lands of a home. The point is this: It is gives an air of privacy. A set of to the best of their ability and with of which, in their absence, they will cheaper and usually more satisfactory screens may be used on this porch-durtheir wealth of experience.

The old agrarian to let nature furnish the attractive suring the summer time, these to be taken roundings and model the home into the out during the winter and glass sash background, than to build the back- inserted in their place. The porch will ground for the home, then act as a blanker to protect the

ficially? The case is not hopeless! By proper architectural treatment a house may be placed on a 50-foot lot which is by no means devoid of beauty. True, it is largely up to the house itself, since little can be expected of the surroundings. The architect, in this case, can hardly hope to obtain pleasing results if the size of the house required is large. When a structure of moderate size is called for, his skill will enable him to so design it that it will appear smaller than it really is.

The attractiveness of a house which will yield well to a decorative treat-ment such as that shown in the accompanying view cannot be questioned The white lower portion, in contrast

Second-Floor Plan.

pleasing and always gives the impres-sion of brightness that goes with wellthe lower walls are faced with beveled siding. The porch is built into the Not that those who have studied in-front of the house from winter winds.

HOME LIFE OF THE BASS. My Dear Buck: You ask for a little info on the habits and home life of the black bass and when and where to find him. The bass, both large and small-mouthed is a roamer, a lively, active hunter for he best place to gorge himself on the hoice minnows, crawfish and helga-mite, with a dessert from the surface of the water of moths, files and frogs. He is a great little traveler, and soon becomes big chief of the waters in which he lives. With such a varied nu, you will find him ever re a fight, equally eager for fly-hook, trolling-spoon, live bait or plug, right on the job to put up a struggle that will test your skill. You can fish for him night or day as he is a 24-hour feeder, but early morning and late

Author of YAKE and STREAM GAME FISHING

afternoon is the surest time to get him right. He is an active rogue and continually rising from the bottom to the surface, at times jumping above the water in pursuit of his feed. He changes his home and feeding ground as the season passes. In the spring he is found in the shallow water in the streams and rivers, below rapids and riffles, as the water warms moves to the deep pools lying alongside of windfalls and logs, rocky ledges and weedy spots. During the hot summer he migrates to greater depths where the water is cool. Likewise in the lakes, the bass are "at in the spring, in the shalled est places, lying off of the sand bars and gravel formation, you can coun on a good catch, close inshore in the the weeds, lilies and reeds are well grown you will find him in that Both the large and smallmouthed bass are often found in the same-lakes, but in different locali-The small-mouth favors the stony bars or shoals varying in depth from two to forty or fifty feet, while the large-mouth prefers the weeds and

### muddy bottoms. East-Wind Not So Bad.

Weather conditions have been blamed since the time of Noah for an empty stringer or creel. Rainy days, pleasant days, all kinds of winds and especially an east wind have been cussed as the cause of "fisherman's Remember this, the bass luck." keeps on filling the feed-bag just the same, and an east wind is better than no wind at all. You will get more bass when the surface of the water is slightly ruffled by a breeze than when fishing on a clear still day. Last year, at the opening of the season in Wisconsin, Jim and I landed 19 fine largemouth bass from a little bay in something less than an hour, one casting while the other held the boat off shore. There was quite a stiff east wind blowing and the surface of the water was broken by a continuous roll of small waves. The five pounds and were caught between five and six o'clock, after we had fished all day with very poor luck, These fish, Buck, were caught with a white Wilson wobbler with a red head and with a Jamison Coaxer plug.

Bass Have Keen Sight. minute forget that a bass has eves. Once he lamps you, your bait or lures are not for him, he as moved to other quarters. Don't stand in the hoat and open up with a personally conducted sightseeing tour before you cast. He also hears, and often you will think that he is exceptionally keen in both of these senses. While in a boat bear in mind that sound vi-The view also shows a neat and in- brations carry farther in the water bass before inviting him to come in

out of the wet: A bass will always gorge his food, but there is quite a difference in his mouthing of baits. If you are fishing with live bait, a minnow, crawfish or frog, he will strike without much force and will mult the bait around in his mouth a bit before swallowing it, in fact with a live min-now he will turn it around in his mouth and swallow it headfirst. In this case do not strike him too quickly, but give him a little time to play the balt before striking. A bass handles a live balt somewhat similar to the play of a cat with a mouse it has caught. Many a time I have torn a minnow in half through striking too soon, having the pleasure of baiting again instead of landing the bass that had a half hold on my bait. If you are ever, strike quickly right after the bass strikes, as he immediately discovers that it is not a choice morsel of food, and disconnects.

United Doctors Specialist Brings the Knowledge of a Great Medical Organization and Their Experience in the Successful

Thousands of Chronic Disease Cases Offer Services Free of Charge

licensed by the State of Michigan. The United Doctors is an organization of reputable, licensed, physicians for the treatment of certain diseases. They are all specialists. The United

Doctors treat, without Surgical Operations or hypodermic injections, dis eases of the blood, skin, and all internal organs, Theumatism, sciatica, tapeworm, leg ulcers, weak lungs and all long standing, deep seated discuses Thirty-five years' experience and the complete records of thousands of

cases successfully treated prove that the methods of the United Doctors are right. They were among the first to be called "Bloodless Surgeons." Each member of the United Doctors staff has at his command the knowledge and resources of the whole or-

ganization. Many people go on suffering, from diseases that can be alleviated just because they cannot afford to go to high priced specialists at a distance from home.

No community has a sufficient number of aufferers from the diseases mentioned to support special hospitals for their treatment and cure.

The United Doctors have solved the problem Their highly trained specialists travel from place to place. They diagnose and prescribe a course of treatment for the sufferers in each community and teach them how to take care of themselves at home.

Worn-out and run-down men or vomen, no matter what your ailment may be, no matter what you have been told, or the experience you have had with other physicians. If your case is incutable they will tell you so. Conin 24 hours, or money refunded. No suit him upon this visit. It costs noth-
